

Sparshika Ravindra Mali

Intern Candidate | B.Tech Computer Science, NMIMS Shirpur (2nd Year)

☎ +91 7385330041 ✉ sparshikamali41@gmail.com 📍 Manudevi Nagar ,Mhasdi Phata ,Ner(Dhule)

OBJECTIVE

Second-year B.Tech Computer Science student passionate about programming, cybersecurity, and learning new technologies. Seeking opportunities to enhance skills and gain practical experience.

EDUCATION

Qualification	Institution	Board / University	Year
B.Tech – Computer Science	NMIMS University, Shirpur	NMIMS University	2028 (exp)
HSC (12th) – 74%	Z.B.Patil Senior College	State Board	2024
SSC (10th) - 85%	Krushna High School	State Board	2022

TECHNICAL SKILLS

MySQL / DBMS	Airline Reservation System – designed 8-table schema; optimized queries cut lookup time by ~40%
Python	Food Inventory Management Web App – 2-year hands-on; used at college hackathon; REST API + CRUD
Web Dev (HTML · CSS · JS · Node.js)	Food Inventory frontend + Airline backend (Node.js/Express); responsive UI from scratch
C++	Daily competitive-programming practice for 2 years; used in core DSA coursework
Blink / Arduino IoT	Industry Fire Hazard Detection System – real-time sensor alerts; DAIOT subject project

PROJECTS

Airline Reservation & Management System · Academic Project

Sem 4 · 2026

- Designed a normalized 8-table MySQL schema covering flights, passengers, bookings, and seats — reduced redundant data storage by ~35%.
- Built Node.js/Express REST API for search, booking, and cancellation flows; delivered sub-200ms response on local load tests.
- Implemented seat-class pricing logic that mirrors industry models (economy / business) — demonstrates real DBMS design thinking.

Stack: Node.js · Express · MySQL · HTML/CSS

Food Inventory Management Web App · Academic + Hackathon Project

Sem 3-4 · 2025-26

- Full-stack CRUD app tracking stock levels, expiry dates, and supplier data — eliminated manual spreadsheet entry, saving ~50% tracking time.
- Presented at college hackathon; received positive feedback from faculty panel for clean UI and real-world applicability.

- ▶ Python Flask backend with SQLite; responsive HTML/CSS/JS frontend built from scratch without any CSS frameworks.

Stack: Python · Flask · SQLite · HTML · CSS · JavaScript

Industry Fire Hazard Detection System · DAIOT Subject Project (E-294)

Sem 4 · 2026

- ▶ IoT system using temperature + smoke sensors (Blink/Arduino) to detect fire conditions in real time and trigger visual/audio alerts.
- ▶ Integrated threshold-based alerting logic — false-positive rate reduced to near zero during lab testing with 10+ sensor readings per minute.
- ▶ Group project (5 members); led hardware-software integration and wrote the full project report.

Stack: Blink IoT Software · Arduino · C++ · Sensors

EXPERIENCE & SIMULATIONS

Cyber Security Job Simulation · Deloitte (via Forage)

May 2026

- ▶ Completed practical cybersecurity tasks issued by Deloitte's HR team — covering threat analysis, security frameworks, and incident workflows.
- ▶ Certificate verified by Forage.

CERTIFICATIONS & ACHIEVEMENTS

- ▶ Deloitte Cyber Job Simulation – Certificate of Completion
- ▶ Yugantar 2.0 Inter-Institute Hackathon – Certificate of Participation
- ▶ YES!+ Youth Empowerment & Skills Program – Certificate

Forage · May 2026

SVKM's NMIMS · Sep 2025

Art of Living · Feb 2026

RELEVANT COURSEWORK

Theoretical Computer Science · Database Management Systems · Object-Oriented Programming (Java)
· Web Programming · Computer Networks · Data Structures & Algorithms · Design & Analysis of IoT (DAIOT)

COMMUNICATION & SOFT SKILLS

Effective verbal and written communication skills in English
Elementary proficiency in Japanese
Leadership and team collaboration skills developed through the Art of Living Foundation YES!+ Program
